Chinese Philosophy (Master/PhD)

Overview

The ECNU Philosophy Department is a major center of philosophical study in mainland China. The department has 20 full professors, 17 associate professors, and a number of lecturers. There are 7 Ph.D. programs (Chinese philosophy, Western philosophy, Marxist philosophy, ethics, logic, philosophy of science, and religious studies) and 7 M.A. programs (Chinese philosophy, Western philosophy, Marxist philosophy, ethics, logic, philosophy of science, and religious studies) in the department.

Our department holds a prestigious place among philosophy departments in China. Our philosophical tradition is in the direct line of the Jin-Feng School of Thought in modern Chinese history, a line that began with the great logician-epistemologist Jin Yuelin and passed on to Feng Qi, founder of the ECNU philosophy department. The department is home to the International Society for Metaphysics since 2012, with Professor Yang Guorong serving as the society's current president. Our Chinese Philosophy Program has enjoyed a high reputation both at home and abroad.

The department's graduate programs began to enroll international students in 1995, and since then has accepted students from U.S.A., Switzerland, Israel, Belarus, South Korea, Japan, Vietnam, Hong Kong, and Taiwan. In recent years the Chinese Philosophy Program has produced top doctoral and post-doctoral international students who have become productive professional philosophers in their own fields of studies.

Statistics (Master/PhD)

Introduction

The probability and statistics program started at East China Normal University as a laboratory in 1960 at the time when Prof. Zongshu Wei, a PhD from Iowa state University, was the leading applied mathematical statistician in Shanghai. Established in 1984, ECNU's mathematical statistics department is was one of three oldest key statistical programs in China. In 1985, the official journal of Chinese Probability and Statistical Society started and established its editorial office at ECNU. Over the years, mathematical statistics department has expanded into the School of Statistics; comprising of Department of Statistics and Actuarial Science (1984), Department of Risk Management and Insurance (1994), Department of Financial Engineering (2010), Statistics and Actuarial Science Consultancy Center (2006), Biostatistics Center (2008), and Academy of Applied Statistical Science (2010). In 2013, the statistics program was ranked No.4 (out of 87 statistics programs) national wide by the Minister of Education and ranked 1st class disciplinary by shanghai municipal education commission.

The statistics program currently has 36 full-time faculty members consisting of 15 full professors, 19 associate professors, 2 assistant professors, among whom three are 'state professors'. More than half of the faculty members have either earned their degrees from prestigious universities in the west or have had tremendous exposure to western curriculum via post-docs research or visiting positions. In addition, the program has three distinguished part-time faculty affiliates from Hong Kong University, Hong Kong Baptist University and Oxford University. Most faculty members are engaged in cutting-edge research in the areas of industry, finance, medical science funded by competitive nationwide as well as provincial grant programs.

The placement record of our graduates has been excellent. Our recent master's graduates have pursued careers split between industry, finance and government. PhD graduates have mostly sought positions at universities and research institutes and some took jobs in the finance industry and pharmaceutical companies commensurate with their training and PhD dissertations.

Politics (Master/PhD)

Overview

The Department of Politics at East China Normal University accepts applications to its 2-year research-oriented Master of Arts in Politics and its 4-year Ph.D. in Politics programs, as offered through the International Graduate Program in Politics. Students who want to study above the undergraduate level in China but are not looking to acquire a graduate degree may apply for a short-term course of study, one or two semesters in all, leading to a graduate certificate. Students actively enrolled at another university are also welcome to apply, as Research Fellows, to complement their studies with the resources which the International Graduate Program in Politics at ECNU has to offer.

The International Graduate Program in Politics has its office on ECNU's main campus in Shanghai. The program focus is Chinese politics. The program's scope is either wide or narrow depending on the interests of the student. The Department of Politics itself is home to experts in political philosophy, political history, political theory and systems, political communication and public relations, political education and participation, international relations, and research methods: the professors's resumes are on the Faculty webpage. As an arm of the Department of Politics, the International Graduate Program in Politics gives its students direct reach of access to all these experts, both as professors teaching courses and also as research and thesis advisors.

Classes offered by other departments cross-listed to be taught in English may be taken each semester. If you have enough Chinese to participate in classes not taught in English you will be encouraged to do so. Mandarin language classes are taught each semester free of charge. These classes are not mandatory but degree-seekers will be required to pass the HSK Level 4 Examination in order to graduate.

All courses will be taught in English. Master's-degree students are required to defend a thesis written in English before an English-speaking defense committee. Doctoral candidates may submit their dissertations either in English or in Chinese. The Department boasts a diverse faculty with many members having got their professional training abroad, earned their doctorates at foreign universities or completed substantial post-doctoral study or held visiting-scholar positions in Hong Kong, Taiwan, Australia, Europe, Canada and the United States. All are regular faculty at East China Normal University and so will be in a position to become mentors as they teach, advise, direct student research, and help graduates to post-graduate opportunities.

ECNU Master Program in Port, Coastal and Offshore Engineering

Overview

The State Key Laboratory of Estuarine and Coastal Research(SKLEC) is located in the East China Normal University (ECNU),Shanghai. The laboratory was established by the State Planning Commission of China in 1989, and went into operation in December 1995. At present there are 58 fulltime faculty and staff members in the laboratory, including 48 researchers, 8 technicians and 2 administrative staff members.

The achievements of the laboratory are used to solve problems encountered in coastal developments in China, especially related to many large engineering projects, such as national comprehensive surveys on coastal resources, construction of harbors and ports, channel regulations, protection of coastal wetlands and engineering structures.

Since more than 20 years, our “Open, Exchange, Unity and Competition” philosophy has been the basic approach of the laboratory. We have developed unique capabilities in developing people, practices, and infrastructure that provide the honest, unbiased science and guidance needed to

help address the pressing issues that face our rivers, estuaries, and coastal systems. SKLEC has established its prominent role as a national centre for high level research of the estuarine and coastal environment and as a high level training base in China.
